When I was little I didn't like to go to bed. I like to go now so I will get plenty of rest. When I eat I get a lot of health from food. I also get plenty of health from running. I also didn't like to brush my teeth. I like to brush them to keep my teeth shiny. I am older and now I like to do all them. But there is something else I don't like to do even now I am older it is home work. That's what I like to do and not like to do.

My favorite academic is reading. Reading is good because it will strengthen your word power, it will teach you stuff, and it is fun. Reading will strengthen your word power because if you don't know a lot of juicy words then reading can help. Reading will teach you stuff like what planets there are and how things work. Reading is also fun. Reading is fun because if you don't have anything to do you can read and if you want to read but don't have any books go to your friends to read. It is always better with a friend. Now you know what my favorite academic is, which is reading.

First off, I would like to start off talking about Warrington Elementary. It is a very fun school you get to learn math, science, social studies, and language. We also get to do morning show where we have to choose to be the anchor, camera 1, camera 2, flag person, or announcements. If your class has up to 1,000 AR points you get a pizza party. People say Warrington Elementary is a great place to work and learn. So, next time why don't you tell me if your school is fun and exciting?

Do you want to keep up with the latest research and discoveries in science? There are many good websites that you can visit to make that easy.

One great site is called Science News for Kids. This site reports science news covering a wide range of subjects. The articles are written with the interests and educational experience of younger readers in mind, but adults will find this site suitable for them as well.

1. The author believes that adults _____

- a. won't understand a site for kids.
- b. will find Science News for Kids useful.
- c. don't like science as much as kids.

To begin with I'm going to talk to all people who like to read. When I was in the library I saw a huge shelf with all kinds of books like "A Dog at the Door." This book is about a dog that was tied to a heavy pot outside. Anyway, they tried to find its owner and at last they sure did. But, you have to read all of it to understand it because I did not tell you the details of it. I bet you didn't know that it is good for you to read because it makes you think on what words mean. If you don't see anyone reading a book like your brother or sister and they are watching a show, unplug it and try putting a book in their faces. I heard of another amazing book named "Buck." It's about this dog that got rescued from a man. Since then they stuck like glue. They were at a river and his owner's friend threw Buck in the water. To save him it took him a long time but he saved him. It's a great story. Now you know about reading.
